Ciener Botanical Garden

PROJECT PROFILE

Type of Building:	Botanical Garden and Event Center
Location:	Kernersville, NC
Size:	19,000 sq ft
Year Built:	2009
Month Started:	Not Disclosed
Length of LOGIX Install:	Not Disclosed

Reason LOGIX was Specified:
Owner wanted a very energy-efficient structure.

Project Description:
Complete Logix construction from basement wine cellar and including the two upper floors.
Extremely tall walls and large window openings.
Many tall free standing walls.

Key Features and Certifications:
Largest ICF commercial building in the triad area.
High demand for lighting - lowest monthly power bill is $800, highest is $988. This low spread indicates the effectiveness of the insulation over the course of the year.
