

# ASSISTED LIVING FACILITIES

Assisted living operators choose to build with Element ICF because it's not just a SMART build—it's also a SMART business strategy

## HIGH PERFORMANCE ADVANTAGES

- Element ICF, with "6 Steps in 1", saves time and money. And a faster build means earlier occupancy and a quicker positive cash flow.
- Element ICF walls are bullet-proof, and, when hurricane glass is installed, during most storms your occupants can safely remain in the building without having to be moved. That means family members will enjoy peace of mind knowing their loved ones are in a safe and comfortable environment.
- The enhanced living experience of a Element ICF-built structure provides you with a strategic opportunity to charge a bit more money in return for the added value it offers, while the ongoing savings you'll experience in energy and maintenance expenses will perpetually drop to your bottom line.

## LOGIX BRANDS IS THE ICF SOLUTIONS COMPANY

Logix Brands provides full-service support and turn-key expertise to designers, GC's and installers to shorten the learning curve and maximize project success.

- Design Assistance
